

In Gunnison, Colorado

the geologist keens  
that the scanner won't  
deduct ten cents

on the Cheerios sale.  
I say f'crisakes, Professor,

Crested Butte Mountain is splitting!  
You must give up negotiations here,

& try to find out if the whole  
continent will shear

off there in a million years.  
New Mexicans will be pissed  
more than a dime's worth!
